appliquées et industrielles

Mathematical Modelling of Natural Phenomena

MMNP publishes original and review papers on Mathematical Modelling in biology, medicine, chemistry, physics, and other areas in the context of real world problems.

mmnp-journal.org

The first mathematics journal in the world to transition to open access using **Subscribe to Open**!

ESAIM: Control, Optimisation and Calculus of Variations

ESAIM: COCV publishes papers and surveys in the areas of Control, Optimisation, and Calculus of Variations. Articles may be theoretical and/or computational and cover topical subjects.

esaim-cocv.org

ESAIM: Mathematical Modelling and Numerical Analysis

ESAIM: M2AN publishes original research papers in Mathematical Modelling and Numerical Analysis providing rigorous theoretical analysis and evidence of computational relevance.

esaim-m2an.org

ESAIM: Probability and Statistics

ESAIM: P&S publishes original research and survey papers in Probability and Statistics. It covers theoretical and practical aspects and methodological developments with applications.

esaim-ps.org

RAIRO – Operations Research

RAIRO – RO is an international journal of high-level pure and applied research on Operations Research. It includes theory and methodology papers, case studies and state-of-the art surveys.

rairo-ro.org

RAIRO – Theoretical Informatics and Applications

RAIRO – ITA publishes original high-level research papers in the area of theoretical computer science and its applications including game theory, quantum computation, cryptography.

rairo-ita.org

All the journals are published by EDP Sciences in partnership with SMAI except for *RAIRO – Theoretical Informatics and Applications* which is published by EDP Sciences only

Subscribe to Open (S2O)

A fair and sustainable open access model

What is S2O?	<ul style="list-style-type: none">● An innovative, transformative model that aims to move subscription journals to open access
How does it work?	<ul style="list-style-type: none">● Following the subscription renewal cycle, a journal joining the S2O programme will publish its newly-accepted content in open access as soon as all subscription renewals have been received, typically at the end of February in Year 1● Pricing is established in a transparent way to balance the costs of publication – libraries are involved in the process through an independent committee● If a journal does not reach the subscription threshold, only subscribers will receive access to papers published in the coming year
Benefits for subscribers	<ul style="list-style-type: none">● Institutions support journals for the common good of the academic community and demonstrate their commitment to open access● Only subscribers get access to ‘moving wall’ archive content that is not yet in open access (embargoed for 5 years)
Benefits for authors	<ul style="list-style-type: none">● Authors publish in S2O journals in open access, free of charge (no APCs) - publication fees are covered by the subscription income● Articles are published under a CC-BY 4.0 license allowing authors to retain the copyright● The license enables authors to be fully compliant with the open access requirements of their institution or funding organisation(s)
Benefits for the community	<ul style="list-style-type: none">● It supports open access and open science and helps to guarantee the long-term scientific independence of researchers through a diversity of publishing models● It supports the values of the mathematics community● It helps to meet the growing demand for open access publications, e.g. Plan S
How can I support S2O?	<ul style="list-style-type: none">● New subscribers may join the mathematics S2O programme at any time by contacting subscribers@edpsciences.org● Additional participation will help the S2O model to thrive and will reduce the subscription price for subscribers
Where can I find out more?	<ul style="list-style-type: none">● Contact SMAI – smi-vp-publications@emath.fr● EDP Sciences Frequently Asked Questions (FAQs) – bit.ly/S2OFAQs● Subscribe to Open Community of Practice – subscribetoopencommunity.org
